

Activity 1

Nature Potions

Get creative in the garden and make some nature potions.... with superpowers! Search for natural materials to mix together with water and food colouring to make some mysterious powerful potions.

Activity 2

Flower Art

Let's try being super creative in our gardens and make our own natural art today. Make your picture frame using twigs or long leaves, then create your nature picture using flowers, sticks and leaves collected from your garden or walks.

Activity 3

Twig Raft

Let's try making some little twig rafts today. If you do not have spare twigs lying around in your garden, experiment with different natural materials. Experiment to see if your raft can float, what you can balance on top of it, and how you can stop it from sinking!

NB Only put your raft on water when you are with your parent or carer.
